Introduction

This document is intended for you as a merchant to quickly get started with the Fyndiq Magento Extension. It contains step by step instructions for installing and setting up the extension and how to use it.

Fyndiq Merchant Support

For any questions, problems or suggestions regarding your Seller Account or the Fyndiq Magento Extension, please contact our team as follows.

For questions regarding selling on Fyndiq, please contact us on: seller@fyndiq.com

For technical questions regarding the API, please contact us on: integration@fyndiq.com

Prerequisites

This document assumes that the following conditions are met before installing the extension:

- Magento version is ≥ 1.7
- PHP version is > 5.2
- Proper access to the Magento installation is available, so the extension can be installed

Please inform Fyndiq Seller Support that you start integrating with the Magento Extension. Every Seller Account will stay in test mode until products have been uploaded and at least one test order has been made (and both checked successfully). Seller Support will activate your account for sales afterwards.

Seller account

The first step to start using the Fyndiq marketplace is to set up a seller account. You can do so at this page: https://fyndiq.se/merchant/create_account/

WELCOME

Start selling on Fyndiq - Create your account today and reach millions of bargain hunters!

Create the account

The form for creating your account is in English, the fields marked by * are mandatory and described below:

Your company

- Name of company
- VAT registration number
- Company address

Contact information

- First name
- Family name
- Phone number
- Email address

Your webshop on Fyndiq

- Webshop name on Fyndiq
- Telephone support
- Return address
- Webshop return country
- Preferred language
- How did you heard about us?

Your account information

- User name
- Password
- Password again for verification

You do not commit to anything by creating an account.

Create an API token version 2

The API token is used for verification between your ecommerce platform and Fyndiq. You create the token when you are logged in at the merchant pages:

<https://fyndiq.se/merchant/>

Go to Settings and in the sub menu API. Click the button labelled "**Create an API v2 Token**". Make sure to use the API v2 Token as marked in the image below.

Create API Token

You can use the button below to create an API Token connected to your account. Your API Token is used to authenticate you during communication with Fyndiq's API.

[Create an API Token](#)

[Create an API v2 Token](#)

To connect one of our latest integrations, an API v2 token is required. Please make sure to generate the correct token by pressing 'Create an APIv2 token' and follow the instructions as described in the Installation Instructions and User Manual for your integration.

When the token is created, you can see it under “**Current API Token**”. It is then used together with the username you chose when creating the account as API credentials.

Note that your username is also visible under API Username.

Installation and configuration

All files needed for the installation of the extension can be found on our developer pages together with this **User Guide** and **Installation Instructions**:

Download

Version 2.0.2 (2016-03-15)

Fyndiq Magento Module v2.0.2 Build 1f1657d

Documentation

- Installation Instructions
- User Guide

Change History

Version 2.0.2

- Enhancement: Added category mapping in the module
- Bugfix: Better support for custom table prefixes

Version 2.0.1

- Enhancement: Functionality integrated within the Magento interface
- Enhancement: Bulk export
- Enhancement: More flexible product pricing scheme
- Enhancement: Better multi-store support
- Enhancement: Marking orders as handled from within Magento
- Enhancement: Support for sending order tracking numbers
- Enhancement: Fyndiq specific product title and description
- Enhancement: More consistent copy
- Enhancement: Field mapping for relevant fields
- Enhancement: Support for cron jobs

Version 1.0.8

- Enhancement: Improved export performance

Installation

<http://developers.fyndiq.com/fyndiq-magento-extension/>

First download the extension from the URL above. Then open the Magento Connect Manager from **System – Magento Connect – Magento Connect Manager**.

Re-enter your administration user account credentials. If for some reason you cannot access Magento Connect Manager, please contact your Magento Administrator.

Please note: If “Put store on the maintenance mode while installing/upgrading/backup creation” is selected, your store will be offline in case something goes wrong during installation. We therefore recommend to uncheck this checkbox before proceeding. Scroll down to Direct package file upload.

Click on the button **Choose File** and choose the file you downloaded, then click open. When returning to the Magento Connect Manager, click **Upload**. The page should scroll to the end and after just a few seconds the installation is complete.

```
Auto-scroll console contents
Package installed:
community-fyndiq-2.0.1
Cleaning cache
...
Cache cleaned successfully
```

Procedure completed. Please check the output frame for useful information and refresh the page to see changes.

[Refresh](#)

At the next step you will connect to Fyndiq. Click Return to **Admin** at the top of the page

Configure and connect

Go to the configuration by clicking **System – Configuration**.

The screenshot shows the Magento Admin Panel interface. The top navigation bar includes 'Dashboard', 'Sales', 'Catalog', 'Customers', 'Promotions', 'Newsletter', 'CMS', 'Reports', and 'System'. The 'System' menu is expanded, showing options like 'My Account', 'Notifications', 'Tools', 'Web Services', 'Design', 'Import/Export', 'Manage Currency', 'Transactional Emails', 'Custom Variables', 'Permissions', 'Magento Connect', 'Cache Management', 'Index Management', 'Manage Stores', 'Order Statuses', and 'Configuration'. The 'Configuration' option is highlighted with a red box. The main content area shows the 'Dashboard' for the 'Sverige' store view, with sections for 'Lifetime Sales', 'Average Orders', and 'Last 5 Orders'. The 'Last 5 Orders' section shows a table with columns for 'Customer', 'Items', and 'Grand Total', and a message 'No records found.'

Then choose **Fyndiq** in the left menu in the GENERAL category:

The screenshot shows the 'General' configuration page for 'Fyndiq'. The left sidebar shows the 'Configuration' menu with 'GENERAL' selected, and 'Fyndiq' highlighted with a red box. The main content area is titled 'General' and contains 'Countries Options'. The 'Default Country' is set to 'Sweden' ([STORE VIEW]). The 'Allow Countries' list includes Afghanistan, Aland Islands, Albania, Algeria, American Samoa, Andorra, Angola, Anguilla, Antarctica, and Antigua and Barbuda ([STORE VIEW]). Below this, there is a section for 'Postal Code is Optional for the following countries' with a list of countries: Guam, Guatemala, Guernsey, Guinea, Guinea-Bissau, Guyana, Haiti, and Iceland and McDonald Islands ([GLOBAL]).

Warnings		
Configuration Scope	Please note that you are working on settings for the "Default Config" configuration scope. Please check the selection in the top left corner of this screen and make sure you are setting up the Fyndiq Magento Extension for the correct scope depending on your requirements. Read the User Guide for more information.	[WEBSITE]

This warning is only visible if you are working on the Default Config. If you have multiple stores in the same Magento installation you might want to have different settings for different shops.

Settings

Settings		
Username	<input type="text" value=""/> [icon]	[STORE VIEW]
	▲ Your Username on Fyndiq	
API Token	<input type="text" value=""/>	[STORE VIEW]
	▲ Please generate an API Version 2 Token on your Fyndiq Merchant Account and add it to this field.	
Customer Group	<input type="text" value="Fyndiq"/>	[STORE VIEW]
	▲ The Customer Group used for prices on Fyndiq	
Global percentage discount	<input type="text" value="0"/>	[STORE VIEW]
	▲ If larger than 0, all prices sent to Fyndiq will be reduced by the percentage entered in this field	
Global absolute discount	<input type="text" value="0"/>	[STORE VIEW]
	▲ If larger than 0, all prices sent to Fyndiq will be reduced by the amount entered in this field	
Minimum Stock Quantity	<input type="text" value="0"/>	[STORE VIEW]
	▲ The number to be deducted from the Magento Stock Quantity when products are exported to Fyndiq. If set to 10, the current quantity for each exported product minus 10 will be sent. If the quantity minus 10 is 0 or lower, a quantity of 0 will be sent to Fyndiq.	
Order Status	<input type="text" value="Processing"/>	[STORE VIEW]
	▲ The Order Status used when Fyndiq Orders are imported	
Shipping Method	<input type="text" value="[fyndiq_fyndiq] Standard"/>	[STORE VIEW]
	▲ The Shipping Method used when Fyndiq Orders are imported	
Payment Method	<input type="text" value="Fyndiq"/>	[STORE VIEW]
	▲ The Payment Method used when Fyndiq Orders are imported	
Disable Order Import from Fyndiq	<input type="text" value="No"/>	[STORE VIEW]
	▲ Deactivate Order Import here, if this is required for your workflows.	
Disconnect account	<input type="button" value="Disconnect"/>	[STORE VIEW]
	▲ This button will remove your current Fyndiq Username and API Token. Products and orders will not be synced anymore.	

**Username**

This is the username for the merchant account you created in the beginning.

API Token

The API Token you created on the merchant page.

Customer group

If you have different prices for different customer groups you can choose which customer group to use for the prices on Fyndiq.

Global percentage discount

If you choose a percentage larger than zero, all prices on Fyndiq will be reduced by the percentage in this field.

Global absolute discount

This is the same as the percentage discount, but with an absolute amount. For example you enter 10, the price will be reduced with 10.

Please note: if both percentage and absolute discounts are set up, both will be applied to product prices

Minimum Stock Quantity

This is the minimum stock quantity for the product to show on Fyndiq. For example if you enter 10, then the quantity on Fyndiq always show 10 less than the actual value.

Order Status

Orders from Fyndiq get this order status when imported.

Shipping Method

Orders from Fyndiq get this Shipping status when imported.

Payment Method

Orders from Fyndiq get this Payment Method when imported.

Disable order import from Fyndiq

This disables the automatic import of orders so you can either manually import them handle orders in another system, if needed. In most cases order import should not be deactivated.

Disconnect account

This will remove the username and API from the settings and disconnect the extension from Fyndiq so that no products or orders are synchronised anymore.

Field Mappings

Field Mappings		
Description	<input type="text" value="Description"/> [dropdown arrow]	[STORE VIEW]
	<small>▲ Field used for the descriptions sent to Fyndiq</small>	
EAN	<input type="text" value="SKU"/> [dropdown arrow]	[STORE VIEW]
ISBN	<input type="text"/> [dropdown arrow]	[STORE VIEW]
MPN	<input type="text"/> [dropdown arrow]	[STORE VIEW]
Brand	<input type="text" value="Manufacturer"/> [dropdown arrow]	[STORE VIEW]

Description

Choose from which field Fyndiq shall get the description for products. If you add text in the field Fyndiq Product Description (on the products tab in Magento), that text will be used instead of the mapped field.

EAN and ISBN

Choose from which field these values shall be received.

MPN and Brand

These two values will together create a unique product identification.

The available choices for Delivery Services on Fyndiq are shown, connect them with the configured Shipping Methods in your shop.

Feed Generation and Troubleshooting

Feed Generation

These choices are for expert use only, please advise with Fyndiq before changing anything.

Latest Feed Update

This shows when the feed was last updated and can be useful with troubleshooting

Installed Extensions

Shows which extensions are installed in Magento. You might be asked to send this list to Fyndiq if you need technical support.

Enable Compatibility Mode

If some installed extensions override views used by the Fyndiq extension, this enables additional configuration pages to access Fyndiq specific functionality.

Reinstall

Reinstalls the extension and keeps the configuration.

When everything is set, click **Save Config** in the upper right corner.

Feed Generation

Use Cron for Feed Generation	<input type="text" value="No"/>	[STORE VIEW]
	<small>▲ If enabled, Magento Cron will be used to generate the Product Feed for Fyndiq.</small>	
Interval	<input type="text" value="10 minutes"/>	[STORE VIEW]
	<small>▲ Interval between Feed Generations</small>

Create products

For products to be able to be uploaded to Fyndiq, the requirements below must be met. If the requirements are not met, the product will not be uploaded and no error message will be shown.

- Must be either a Configurable product or Simple product.
- Must have a unique SKU.
- Must have a valid tax class.
- Must have a valid base image of at least 200x200 pixels.
- Inventory must be set **In Stock**.
- Must not be disabled.
- Must be assigned to a category.
- Must have a description which is at least ten characters in length.
- Must have a name which is at least five characters in length.

To better understand the process of creating a product, below is a walkthrough of the necessary steps for creating a product. Kindly note that this section focus on the relevant fields for an export to Fyndiq. You can find more detailed information regarding products and their creation on your Magento documentation.

General settings

The screenshot shows the 'General' settings form for a product. The form is organized into several sections:

- Name ***: A text input field with a small icon on the right. Scope: [STORE VIEW]
- Description ***: A large text area. Scope: [STORE VIEW]
- Short Description ***: A text area with a 'WYSIWYG Editor' label above it. Scope: [STORE VIEW]
- SKU ***: A text input field. Scope: [GLOBAL]
- Weight ***: A text input field. Scope: [GLOBAL]
- Set Product as New from Date**: A date input field with a calendar icon. Scope: [WEBSITE]
- Set Product as New to Date**: A date input field with a calendar icon. Scope: [WEBSITE]
- Status ***: A dropdown menu with the option '-- Please Select --'. Scope: [WEBSITE]
- URL Key**: A text input field. Scope: [STORE VIEW]
- Visibility ***: A dropdown menu with the option 'Catalog, Search'. Scope: [STORE VIEW]
- Country of Manufacture**: A dropdown menu. Scope: [WEBSITE]

The name filled in must contain at least 5 characters and the description at least 10 characters.

SKU is a unique identifier of your product.

For a product to be easily accessible for your customers on Fyndiq, choose Catalog, Search. This will make your product visible when customers search for keywords linked to your product and makes it visible in the Fyndiq catalog.

Price settings

Navigate to the price settings on the left hand menu.

Prices Create New Attribute

Price * [GLOBAL]

Group Price

Website	Customer Group	Price	Action
			<input type="button" value="Add Group Price"/>

Special Price [GLOBAL]
The Special Price is active only when lower than the Actual Price

Special Price From Date [WEBSITE]

Special Price To Date [WEBSITE]

Tier Price

Website	Customer Group	Qty	Price	Action
				<input type="button" value="Add Tier"/>

Apply MAP [WEBSITE]

Display Actual Price [WEBSITE]

Manufacturer's Suggested Retail Price [GLOBAL]

Tax Class * [WEBSITE]

Prices can be set with decimals separated by period (.), do not use comma (,). For example 97.95.

Your products have to have a proper TAX class. All prices are set including taxes. This can be changed if you navigate to **Magento Admin panel – System – Configuration** and in the menu on the left hand navigate to **Sales – Tax**.

Image settings

In order for a product to be uploaded to Fyndiq it requires to have at least one image assigned to the product. Navigate to Images settings in the menu on the left hand side.

Images

Image type and information need to be specified for each store view.

Image	Label	Sort Order	Base Image [STORE VIEW]	Small Image [STORE VIEW]	Thumbnail [STORE VIEW]	Exclude	Remove
No image			<input type="radio"/>	<input type="radio"/>	<input type="radio"/>		

No file chosen

Click Browse Files... to choose image(s) from your local computer, then upload by clicking Upload Files. Note that images must be at least 200x200 pixels. When uploaded, you see them in the list.

All products must have a Base Image assigned by selecting the radio button in the **Base image column**.

Inventory settings

The last setting in this walkthrough is Inventory, navigate to these settings on the left hand menu.

Inventory		
Manage Stock	<input type="text" value="Yes"/> <input type="checkbox"/> Use Config Settings	[GLOBAL]
Qty*	<input type="text" value="0"/>	[GLOBAL]
Qty for Item's Status to Become Out of Stock	<input type="text" value="0"/> <input type="checkbox"/> Use Config Settings	[GLOBAL]
Minimum Qty Allowed in Shopping Cart	<input type="text" value="1"/> <input type="checkbox"/> Use Config Settings	[GLOBAL]
Maximum Qty Allowed in Shopping Cart	<input type="text" value="10000"/> <input type="checkbox"/> Use Config Settings	[GLOBAL]
Qty Uses Decimals	<input type="text" value="No"/>	[GLOBAL]
Backorders	<input type="text" value="No Backorders"/> <input type="checkbox"/> Use Config Settings	[GLOBAL]
Notify for Quantity Below	<input type="text" value="1"/> <input type="checkbox"/> Use Config Settings	[GLOBAL]
Enable Qty Increments	<input type="text" value="No"/> <input type="checkbox"/> Use Config Settings	[GLOBAL]
Stock Availability	<input type="text" value="Out of Stock"/>	[GLOBAL]

Quantity

Set quantity of your product.

Stock availability

For products to be exported to Fyndiq they have to be set as In Stock

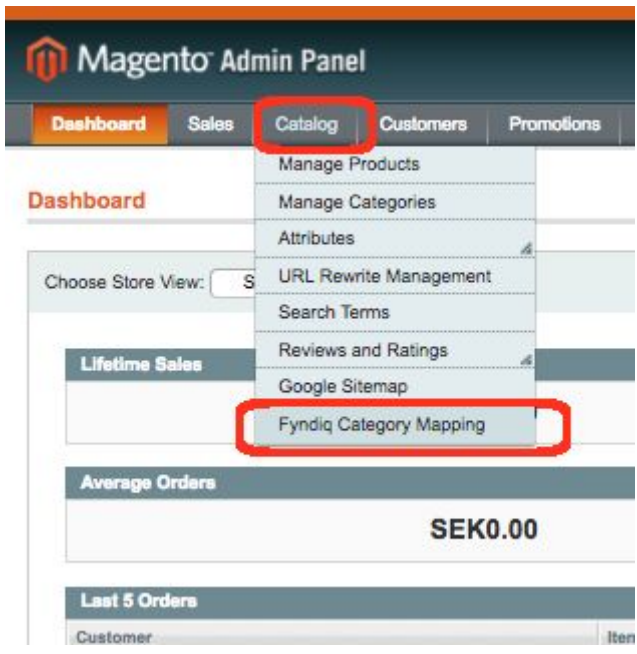

Save the product

On top of the settings you can choose either **Save** or **Save and Continue Edit**

Mapping categories

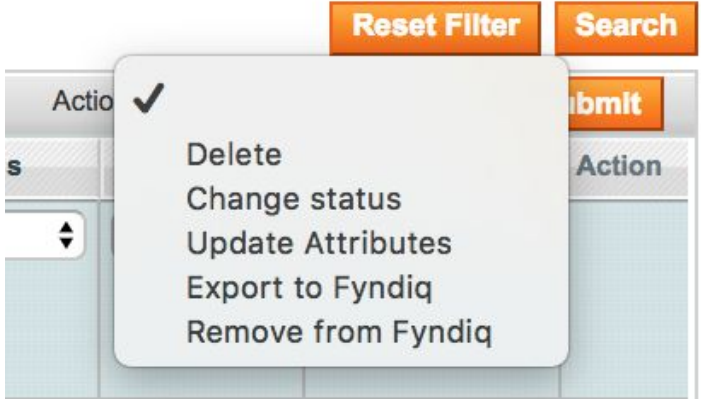

You have the possibility to map your categories to Fyndiq's categories for a better product visibility. Use the function **Fyndiq Category Mapping** under the **Catalog** section.

Export products to Fyndiq

Go to **Catalog - Manage products**.

Select the products you want to export to Fyndiq and choose the action **"Export to Fyndiq"**. You can also remove products.

In the product overview, note the column named **Fyndiq**. This shows if the product is marked to be exported:

If **Yes** the product will be exported on the next update.
If **No** it will be removed (if already on Fyndiq) on the next update.

Note that exports will be processed at least once per hour, and it might take some time until you can see the products in your merchant account.

Merchant Pages

You find your merchant page where you created your API Token, <https://fyndiq.se/merchant/>, login with the credentials you created in the beginning.

Click on **Products** to verify if your products are uploaded:

The screenshot shows the FYNDIQ merchant dashboard. At the top left is the FYNDIQ logo with the tagline "Bargain shopping online". On the right, it says "Logged in as fyndiq.ir". A navigation menu contains "Overview", "Orders", "Products" (highlighted with a red box), "Payments", "Settings", "Contact Fyndiq", "Merchant Wiki", and "Analytics". Below the menu are buttons for "My products" and "New product".

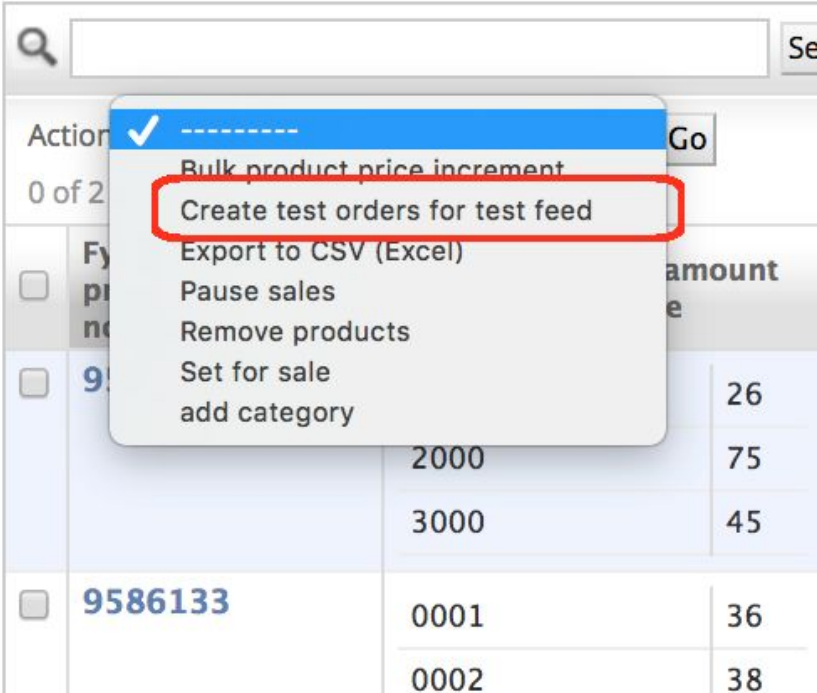

Below the navigation is a "Find product" section. It includes a search bar, a filter dropdown, and a table of products. The table has columns for "Fyndiq's product no.", "Your article no & amount in stock per article", "Product", "Num sold", "Price at Fyndiq", "Amount left", "State", and "Category".

Fyndiq's product no.	Your article no & amount in stock per article	Product	Num sold	Price at Fyndiq	Amount left	State	Category
9586141	1000 26	Plastic box	2	19,00 kr	146	For sale	Boxes & Baskets

Create test order

To create a test order and make sure everything works choose a product, select “**Create test orders for test feed**” in the drop down menu and click **Go**.

Find product

Enter an amount and select the product, then click **Create**. You will return to the product page and see a message stating your order were a success.

Create test orders

Choose articles to use for test orders

Please note that no real orders are created, and the number in stock for the article won't decrease on Fyndiq

Amount:

Articles:

- small for product id #9586141
- medium for product id #9586141
- large for product id #9586141

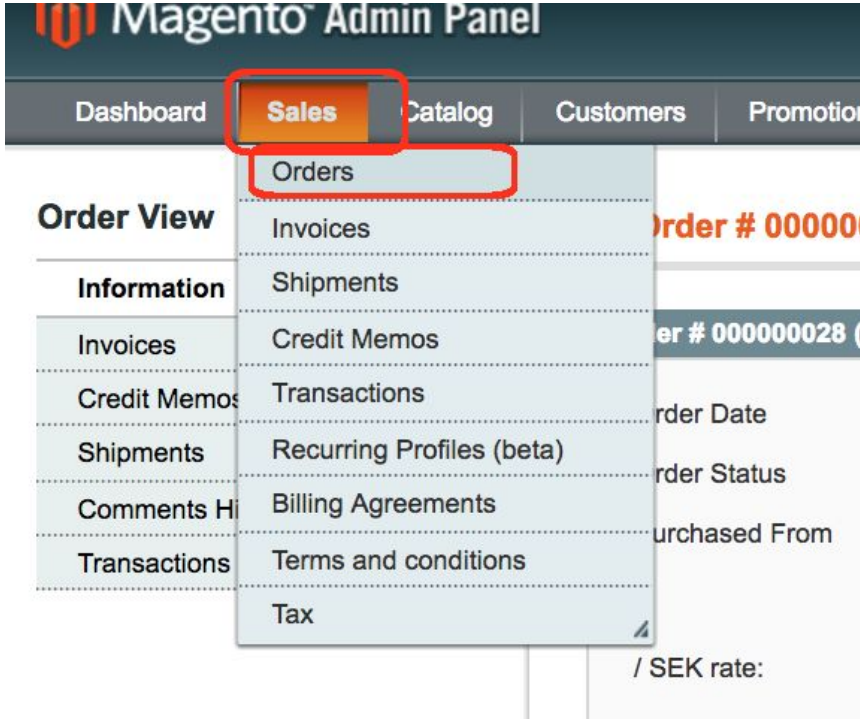

Return to your Magento Admin Panel and follow the next chapter to make sure your test order is imported.

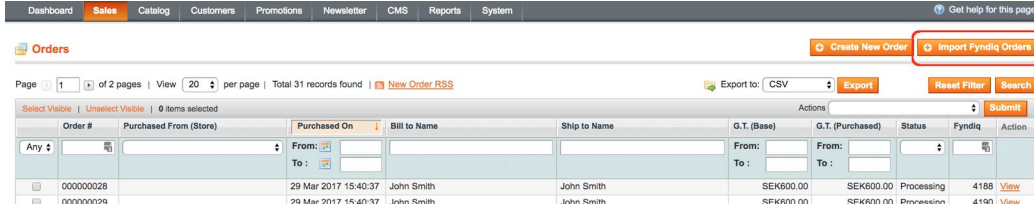

Please note: Test orders can only be created as long as your account is in test mode.

Import and handle orders

Log in to your Magento admin page and go to **Sales – Orders**.

When your account is fully active, orders should appear in Magento automatically. In case an order does not show up as expected, please click **Import Fyndiq Orders** on the right hand side, above the order listing.

Click the order to see the details.

Activate account

When everything works as expected you have to activate your account to be able to start selling your products on Fyndiq. Please contact our support for account activation. See Fyndiq Merchant Support on page two for contact information.
